

# Puppy Preschool

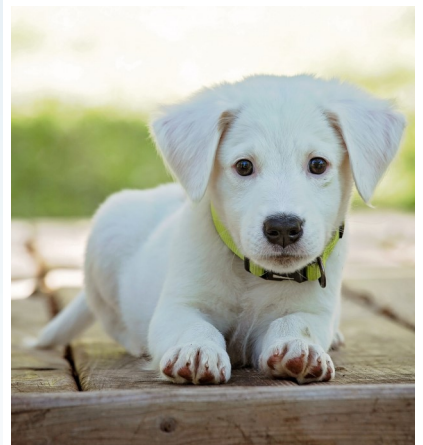

Whitianga Vets runs a Puppy Preschool course that is held over a 4-week period. The class meets at the clinic one night a week at 6 pm, for an hour of learning, training and fun!

Your puppy goes through a key learning stage between 8-16 weeks. This is when puppies need socialising the most, however this conflicts with vaccination protocols. Puppy Preschool is a great way to get around this problem, as the clinic is a controlled environment and therefore there is no risk to your puppy's health.

The course covers important aspects of your dog's healthcare such as handling techniques and how to perform a clinical exam. This means that you, as an owner, are better equipped to notice health issues that require attention. The course also covers issues such as parasite control, immunisation, and nutrition. But it is not all about theory! Your puppy will get to run around and learn some cool tricks whilst making new friends.

The cost of the course is \$90. This includes a take-home course information pack, important information, phone numbers and some extra treats!

*We look forward to meeting you and your puppy at our next course.*
